5.28 Fire Safety Plan.

Introduction

Eyrie Canyon Subdivision Phase 7 is a single-family detached residential subdivision consisting of 11 buildable lots and 1 common lot on 7.007 acres presently addressed as 2100 West Bent Bow Street. The site is located in the Boise Foothills within the Wildland Urban Interface (WUI) Area A. This Fire Safety Plan is proposed to meet the requirements of Boise City's WUI Fire Code.

Project Size

As stated in the Introduction, this project proposes 11 buildable lots and 1 common lot on 7.007 acres. This is the 7th phase of an existing residential development.

Project Location

This project is situated in the SE ¼ of the NE ¼ of Section 28, T4N, R2E, Boise Meridian, City of Boise, Ada County, Idaho, and is adjacent to and south of Eyrie Canyon Subdivision Nos. 5 and 6.

Topography

Due to the project's location in the Foothills, the topography of the site includes varying grades with moderate street slopes. Construction in this phase was governed by the City of Boise's Hillside Ordinance to ensure protection from hazards associated with slope, erosion, and other safety concerns. The general drainage pattern for the site is from south to north, with the lots draining to the street.

Water Supply

United Water provides water supply to this subdivision via the extension of an 8" water main in West Bent Bow Street. Additional fire hydrants have been installed at two locations: one approximately 120' south of the transition between West Bent Bow Street and West Bent Bow Court, and the other in the cul-de-sac at the terminus of West Bent Bow Court. All lots within the subdivision have an irrigation connection to United Water for seasonal yard maintenance.

Access

Access to this project is taken from 36th Street onto local subdivision streets. West Bent Bow Court, this phase's interior street, connects to West Bent Bow Street, which connects to North Arrow Villa Way, which connects to North Villa Ridge Way, which connects to North Eyrie Way, which connects to 36th Street north of Hill Road. West Bent Bow Court terminates at a cul-de-sac with a radius of 48', which meets Boise City Fire Department turnaround standards. Additionally, the cul-de-sac is signed to prevent parking and ensure proper fire department access and mobility.

Fire Protection Requirements

All structures within this subdivision shall be constructed in accordance with the International Fire Code, International Building Code, Boise City Code, and the WUI Fire Code for Area A. The following construction elements are required for development within Area A.

- All roofs in Area A must be Class A non-combustible and be firestopped at the end eaves.
- Siding materials must have ignition-resistant construction and the 50% replacement rule is in effect.
- Eaves, soffits and facias must be protected on the exposed sides with 1-hour construction.
- Exterior walls must meet one of several options for fire resistant construction.
- Unenclosed underfloors and the underside of decks and projections must be 1-hour construction.
- Exterior doors and windows must meet fire resistant standards.
- Vents must be screened and/or located to exclude embers.
- Fire sprinklers are required for all buildings over 5,000 square feet in size.

Defensible Space & Vegetation Management

Per the WUI Fire Code, the following shall apply to development within Area A:

Defensible space with a minimum dimension of 30-feet is required around any structure that abuts undeveloped land. The first preference for meeting this requirement is that the defensible space be in a common lot or roadway around the affected perimeter of the development. If that is not practical, then the defensible space may be provided within a private yard area.

These guidelines are intended to provide direction for the establishment of defensible space for private yard areas and common areas within Eyrie Canyon Subdivision Phase 7.

- All space shall be cleared of dead vegetation of any kind promptly so as to prevent accumulation of fire-hazardous materials.
- Fire-resistant, non-resinous, and drought tolerant trees, shrubs, and grasses shall be utilized.
- Excessive numbers of plantings shall be avoided and grassy areas are preferred.
- All plant material shall be maintained to regularly remove any dead stems, needles, and/or leaves, which can provide fire fuel.
- Any small trees and/or shrubs shall be pruned to a crown height of 10 feet to minimize fire fuel.
- Plants with woody stems and branches, which require prolonged heat to ignite, shall be utilized.
- Once established, larger trees shall be pruned and maintained to develop a canopy of 10 feet above adjacent ground to minimize fuels.
- Any gravel surfaced areas shall be routinely sprayed in accordance with herbicide manufacturers' recommendations on a regular basis to prevent the growth of weeds.
- Lot owners shall limit the storage of combustible materials within the defensible space as much as possible. This includes wood, patio furniture, and other non-fire-resistant materials.

Enforcement

The guidelines set forth in this Fire Safety Plan shall be incorporated into the CC&Rs for Eyrie Canyon Subdivision Phase 7, and compliance with this Plan shall be overseen by the Eyrie Canyon Subdivision Homeowners Association.
